Email	:	sohailkhan128786@gmail.com
Address	:	Islamabad

About Me

I am a passionate ASP.NET Core Developer with a mix of junior and mid-level experience in building web applications. With 6 months of hands-on experience in ASP.NET Core, C#, and SQL Server, I've developed reliable and user-friendly applications. I focus on creating secure user authentication with ASP.NET Identity and dynamic interfaces using jQuery, while adhering to best practices like the Repository Pattern. Proficient in front-end development with HTML, CSS, and JavaScript, I thrive in agile environments and enjoy collaborating with teams. Eager to learn and improve, I am dedicated to contributing to efficient software solutions that enhance user experiences.
